Anaesthesia for the Elderly Patient (Paperback)

By Chris Dodds, Chandra M. Kumar, Frederique Servin

Oxford University Press, United Kingdom, 2017. Paperback. Condition: New. 2nd Revised edition. Language: English. Brand New Book. Global ageing, in both developed and undeveloped countries, has made the need for high-quality knowledge and research on anaesthesia for the elderly increasingly important. The second edition of Anaesthesia for the Elderly Patient offers the anaesthetist guidance on the evaluation and management of elderly patients that present at hospital for surgery and anaesthesia. Containing 15 chapters on key topics such as emergency anaesthesia, orthopaedic surgery, and neurosurgery, as well as a new chapter on Anaesthesia for Non-Theatre Environments, this book ensures the reader is fully prepared for the clinical challenges they may face when working with this ever-growing vulnerable group. Part of the Oxford Anaesthesia Library series, this second edition of Anaesthesia for the Elderly Patient offers a fully up-to-date comprehensive introduction to the major clinical issues facing anaesthetists working with elderly patients. All chapters are fully updated and content is presented in a concise and easy to read format, with helpful key points listed at the start of each chapter.

Reviews

This is an incredible book that I have ever read through. It can be really exciting through reading through time period. I discovered this publication from my i and dad recommended this pdf to find out.
-- Friedrich Lynch DDS

Basically no terms to clarify. It can be written in basic terms instead of difficult to understand. I am easily could get a enjoyment of reading through a composed publication.
